WORK EXPERIENCE

SUSE Software Solutions Germany GmbH

Apprentice Software Engineering

Sep 2022 - Feb 2025

- Successful completion of a 2,5-year apprenticeship
- State-certified software engineer
- Contributions to Open-Source projects in an enterprise environment
- Automated registration process for prototype hardware with IP address management tools
- Creation of Proof-of-Concept in regards to performance and maintenance improvements for openQA
- Applied behavior driven development concepts using the Cucumber framework
- Extensive experience using SUSE Linux distributions (openSUSE Tumbleweed/SLES) as main operating system for software development

PROJECT

Nazara - (github.com/The-Nazara-Project/Nazara)

Jun 2023 - Present

- Rust CLI application for automatic system registration with NetBox IP address management tool
- Use of REST API with complex data structures
- Design and implementation of custom configuration parser and translation logic of application data structures into API representation
- Creation of supporting libraries and software tools according to emerging requirements
- Self-organized project delivery
- RPM packaging

isotest-ng - (github.com/os-autoinst/isotest-ng)

Mar 2024 - Sep 2024

- Reimplementation of the openQA core 'isotest' module in Rust
- Use of Rust's asynchronous programming features to create libraries for VNC connection and data transfer
- Creation of a VNC proxy to send user input to a test worker and analyze visual response data
- Creation of supporting development documentation and styleguides

cobbler-tftp - (github.com/cobbler/cobbler-tftp)

Mar 2023 - Jun 2023

- Stateless TFTP-server daemon to issue boot configuration files via the 'Cobbler' Linux deployment server
- Implementation of a CLI frontend and a configuration parser module
- Implementation of a code quality CI and test automation
- Setup of automatic documentation deployment to readthedocs.io using the Sphinx framework

EDUCATION

Kronberg Gymnasium Aschaffenburg

A - Level

March 2017

- "Abitur" Certificate (Final Grade: 3,0)
- English C1
- Completed Latinum and Graecum certifications

SKILLS

Python ●●●●●●●

Rust ●●●●●●●

Git ●●●●●●●

- Proficient in managing smaller FOSS projects
- Proficient in GitHub CI automation
- Experienced use of Linux distributions (openSUSE, KDE Neon, Garuda)
- Confident in working within agile paradigms (SCRUM/Kanban)
- Confident interaction with upstream maintainers and contributors
- Basics of the C and Bash programming languages
- Basics of containerization with Docker and Docker-Compose
- Fundamentals of RPM-Packaging
