

# Tiara Lena Hock

Software Engineer with Open Source in Her Heart

✉ tiara.dev@proton.me

📍 Nuremberg, Germany

🐙 [github.com/ByteOtter](https://github.com/ByteOtter)

## WORK EXPERIENCE

### SUSE Software Solutions Germany GmbH

Apprentice Software Engineering

Sep 2022 - Feb 2025

- Successful completion of 2,5 year apprenticeship
- State-certified software engineer
- Contributions to open source projects in an enterprise environment
- Automated the registration process for prototype hardware with IP address management tools
- Created Proof-of-Concept in regards to performance and maintenance improvements of openQA
- Applied behaviour driven development concepts using the Cucumber framework
- Extensive experience using SUSE Linux distributions (openSUSE Tumbleweed/SLES) as main operating system for software development

## PROJECT

### Nazara - ([github.com/The-Nazara-Project/Nazara](https://github.com/The-Nazara-Project/Nazara))

Jun 2023 - Present

- Rust CLI application for automatic system registration with NetBox IP address management tool
- Use of REST API with complex data structures
- Design and implementation of custom configuration parser and translation logic of application data structures into API representation
- Creation of supporting libraries and software tools according to emerging requirements
- Self-organized project delivery
- RPM packaging

### isotest-ng - ([github.com/os-autoinst/isotest-ng](https://github.com/os-autoinst/isotest-ng))

Mar 2024 - Sep 2024

- Reimplementation of the openQA core 'isotest' module in Rust
- Use of Rust's asynchronous programming features to create libraries for VNC connection and data transfer
- Creation of VNC proxy to send user input to a test worker and parse visual response data
- Creation of supporting development documentation and styleguides

### cobbler-tftp - ([github.com/cobbler/cobbler-tftp](https://github.com/cobbler/cobbler-tftp))

Mar 2023 - Jun 2023

- Stateless TFTP server daemon to issue boot configuration files via the Cobbler Linux deployment server
- Implementation of a CLI front-end and a configuration parser module
- Implementation of a code quality CI and test automation
- Setup of automatic documentation deployment to readthedocs.io using the Sphinx framework

## EDUCATION

### Kronberg Gymnasium Aschaffenburg

A - Level

March 2017

- "Abitur" Certificate (Final Grade: 3,0)
- English C1
- Completed Latinum and Graecum certifications

## SKILLS

Python ●●●●●●

Rust ●●●●●●

Git ●●●●●●

- Proficient in managing smaller FOSS projects
- Proficient in GitHub CI automation
- Proficient use of Linux distributions (openSUSE, KDE Neon, Garuda)
- Confident in working within agile paradigms (SCRUM/Kanban)
- Confident interaction with upstream maintainers and contributors
- Experienced in containerization with Docker and Docker-Compose
- Basics of C and Bash programming languages
- Fundamentals of RPM packaging using the Open Build Service (OBS)
